

Researchgroup Lean / World Class performance

# Smart & Lean

How can smart and lean improve operations in manufacturing

# Agenda

- Who Am I?
- What is (in short):
  - Lean
  - Smart
- So what is Lean & Smart (for Manufacturing)?

# Who am I?

- Menno Herkes
- Researcher HAN university of applied sciences.
- Previous over 10 years working experience

**Focus:**

Human centred technology & Proces development

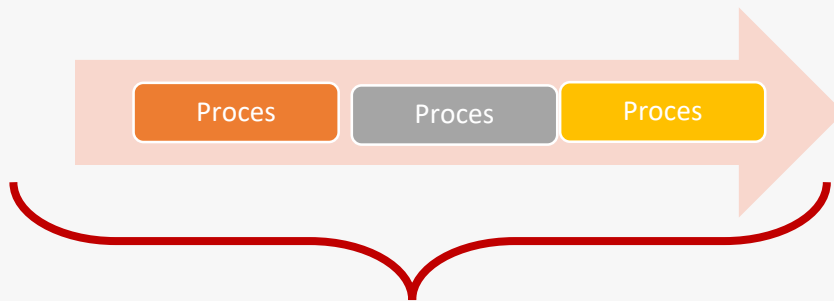

# Smart & Lean

How can you :

Improve Quality & Efficiency

Reduce Throughput time & Cost

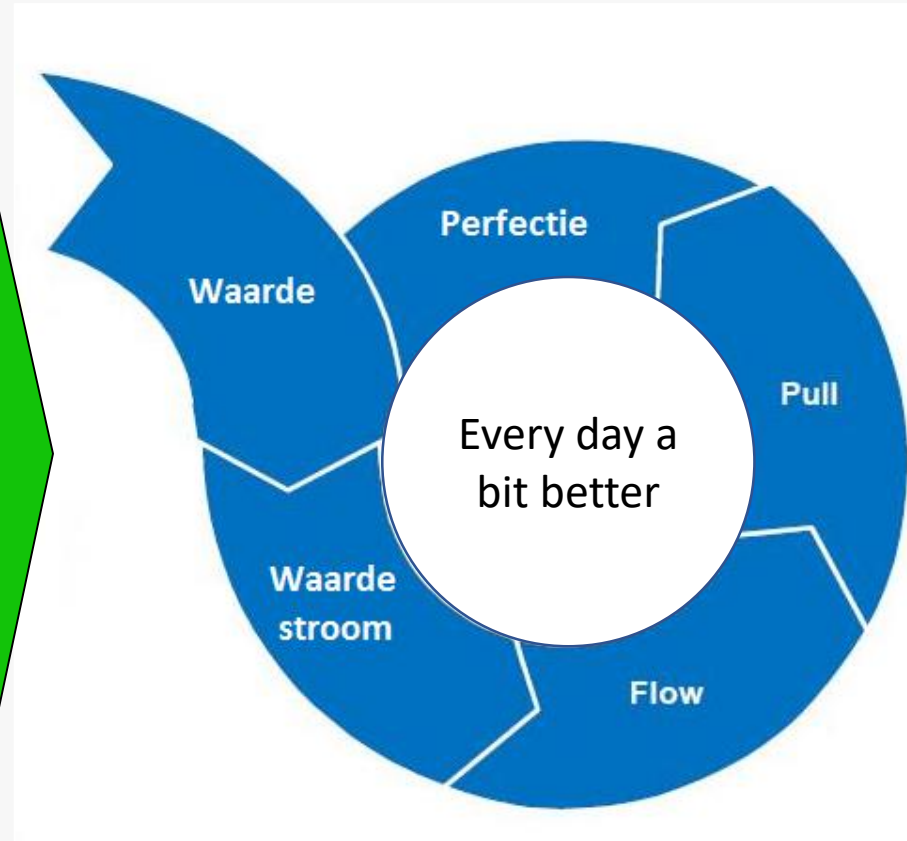

TIME

NOK / €

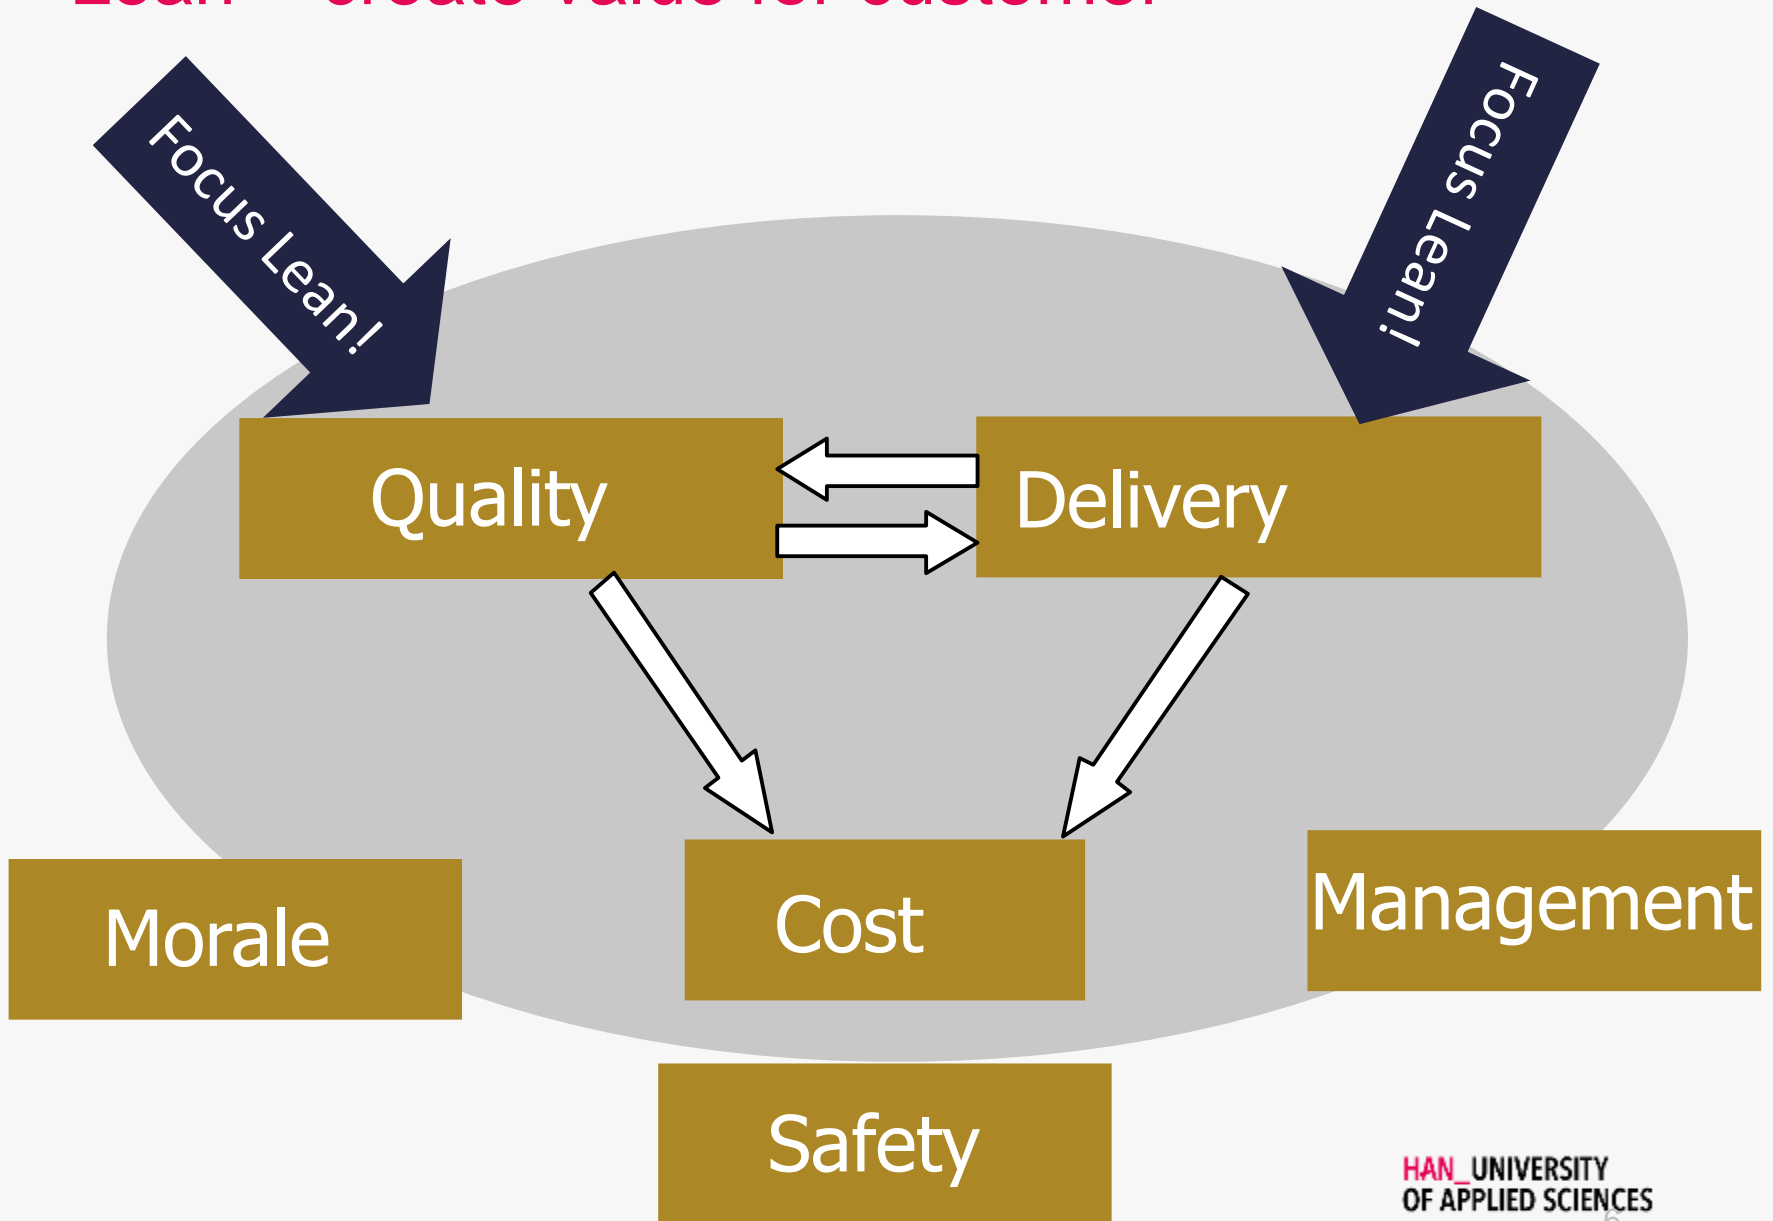

# Lean in short

Value	What is value for you customers (and their customers?)
Value stream	How do we make this value? The process
Flow	Reduce waste
Pull (&Takt)	Only produce what you need to produce.
Perfection	Next time will be better! (and better and better and better and better)

Lean = create value for customer

# High variety – low volume

## Diversification of customer demand:

Makes production companies to perform:

- Faster ...
- With more variance...
- In lower quantities...

# Smart in short

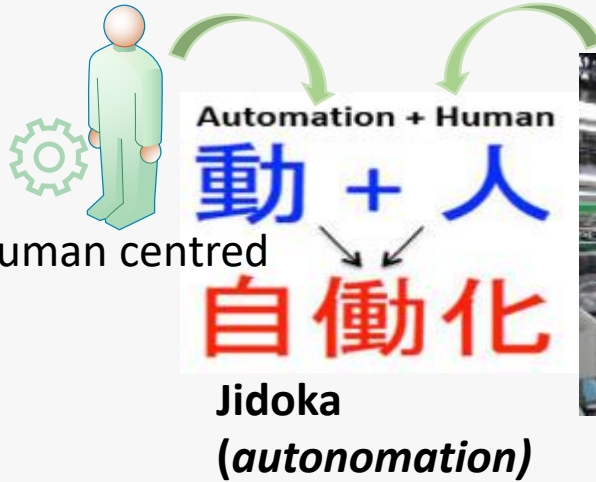

## Cyber Physical systems

# Fit or un-Fit?

## LEAN:

(low) Technology support

Small step improvement

## SMART:

Data driven,

High Technology,

Disruptive change

Lean Production ->

## Step 1

## Step 2

## Step 3

# Does it have to be extreme??

Or direct in LEAN support.....

iBin

Digital Heijunka-Board

ANDON  
Smart Watch

# It can be simple too....

# Start of smart in order picking

# Start of smart assembly

# Phases of development

Situation 2:  
Historical data to VM

Situation 3:  
Info based on simple  
rules to VM

Situation 4: full digital model to VM

**Towards the Digital Factory:  
Different options**

Automation is good, so long as you know exactly where to put the machine.

Eliyahu Goldratt

The first rule of any technology used in a business is that **automation applied to an efficient operation will magnify the efficiency.**

The second is that **automation applied to an inefficient operation will magnify the inefficiency.**

Bill Gates
