Myfab and NorFab User Meeting 21-22 April, 2015

The second joint Myfab-NorFab User Meeting was facilitated by Lund Nano Lab at Lund University. Around 250 active cleanroom users from Sweden, Denmark, Finland and Norway participated. The program included four invited plenary speakers:

- Lars Samuelson, Lund University, Sweden, "From 1st Lund NanoLab 1990 to world-leading nano-research and promising spin-out companies"
- Lennart Ramberg, entrepreneur, Sweden, "My billion dollar cleanroom experience"
- Helinor Johnston, Heriot-Watt University, Edinburgh, United Kingdom, "Approaches used to assess the safety of nanoparticles"
- Peter Bøggild, DTU NANOTECH, Copenhagen, Denmark, "Challenges in large area graphene fabrication and characterisation"

The remaining presentations were organized in four parallel sessions, each of 5 short presentations and “tutorials” focusing on the following topics:

- Materials analysis and characterization
- Thinfilm technologies
- Etching technologies
- Lithography

In addition, there was a poster session displaying 54 posters and guided tours of Lund Nano Lab, MAX-lab and MAX IV.

A conference dinner at the Grand Hotel in Lund topped the social networking in a very pleasant atmosphere.

The 35 Norwegian participants were sponsored by NorFab.
