

## Find your industry partner within Micro- and Nanotechnology and Advanced Materials

Increase your research network and position your research towards calls within the BIA and NANO2021 programs of the Research Council of Norway and EU's Horizon2020. In these programs, cooperation between academic research groups and industry is often emphasized. Micro- and nanotechnology and advanced materials are key drivers for innovations in many fields, such *medical technology, renewable energy, clean water and efficient use of natural resources*. Make the most out of the national infrastructure facilities for materials science, microsystems and nanotechnology in Norway.

### Nano-Matchmaking seminar 2015

Location: Scandic Hotel Lerkendal

**June 2nd, 10:00-16:00**

The seminar is organized by the national infrastructure facility NorFab

*Participation, including lunch, is free of charge.*

**[Register here by May 12<sup>th</sup> 2015](#)**

Use this opportunity to present your company's research interests and needs in 5-10 minutes towards other companies and participants from several academic institutions in Norway.

Detailed program will be announced at: [www.norfab.no](http://www.norfab.no)

# Preliminary Program

## Nano-Matchmaking Seminar

June 2nd, 10:00-16:00

09:30-10:00 Registration and coffee

10:00-10:15 Welcome

10:15-10:45 Funding opportunities (NFR)

10:45-12:00 Industry presentations (5-7 min per presentation)

12:00-13:00 Networking - Lunch

13:00-13:20 News about National Infrastructures within Nanotechnology

13:20-13:30 Nanotechnology Education in Norway (Timini)

13:30-15:00 Academic and institute presentations (5-7 min per presentation)

15:00-16:00 Mingling with finger food

16:00 Concluding remarks
