

# How to import references from Google Scholar

**!** Make a back up of your EndNote library before doing major changes or imports to EndNote

Click on the **"Menu-con" (1)** and then **"Settings" (1)**.

In the bottom of the settings page you will find **"Bibliografi manager" (3)**.

Tick **"Show links to import citations into" (4)** and **"EndNote" (5)**.

Finish with **"Save" (6)**.

## 3 Bibliography manager

Don't show any citation import links.

### [HTML] Vitamin C for preventing and treating the common cold

RM Douglas, [H Hemilä](#) - PLoS medicine, 2005 - dx.plos.org

The role of **vitamin C** in the prevention and treatment of the **common cold** has been a subject of controversy for at least 60 years. Public interest in the subject, stimulated originally by the vigorous advocacy of Nobel laureate Linus Pauling during the 1970s [1], continues to be high. We ...

Bellow each reference in the result list you find the link **"Import into EndNote" (7)**. Click on this link to import the reference into EndNote.

Different web browsers have different dialogue boxes, but choose always **Open (8)** and the reference will be imported into EndNote.

Vil du åpne eller lagre **scholar.enw** (211 byte) fra **scholar.google.no**? 8 Åpne Lagre ▾ Avbryt ×

EndNote will now only list the imported references. We recommend that you check a couple of references to see that the import was correct. Google Scholar does not always import all data correctly and manually corrections may be needed in the library. This applies especially for non-article references.

Click on "**All references**" in the left pane to see all references in the library.

## Direct import of several references at the same time:

Google Scholar search results for "common cold". The search bar shows "common cold" and the results list several articles. A red star icon is visible next to the first article, and a red arrow points to it. The "My library" link is also visible in the top right corner.

NB! You need a Google account and need to be logged on to use this feature.

Click on the star (**red arrow**) under each reference you want to export to save them in your GS library.

They are now available in "My Library" on the top, right side (**red arrow**).

Google Scholar "My library" page. The page shows a list of saved references. A red arrow points to the "My library" link in the top right corner. Another red arrow points to the "EndNote" option in the "Showing all articles" dropdown menu. A third red arrow points to the "Psychological stress and susceptibility to the common cold" article in the list.

Click on "MY Library" to access the saved references. Tick the ones you want to send to EndNote.

Choose "EndNote" (**red arrow**) from the drop down menu.

Finish the import by following the description in **(8)** (previous page).

EndNote will now only list the imported references. We recommend that you check a couple of references to see that the import was correct. Google Scholar does not always import all data correctly and manually corrections may be needed in the library. This applies especially for non-article references.

Click on "All references" in the left pane to see all references in the library.
