ABOUT ENDNOTE

EndNote is a reference management program. You can use EndNote to create your own personal reference library. You can then insert citations in a Word document and generate a bibliography in the citation style you require.

OBTAINING AND INSTALLING ENDNOTE

NTNU has a site licence for EndNote, which permits staff and students of the university to use the program both at work and at home. Contact *Orakeltjenesten* if you have any enquiries about installing EndNote.

GUIDES

- The EndNote YouTube channel contains several guides
<https://www.youtube.com/user/EndNoteTraining>
- NTNU University Library, Medicine and Health Library offers guides and information
<https://www.ntnu.no/blogger/ub-mh/en/endnote-zotero/>

CREATING A NEW LIBRARY

From EndNote's **File** menu, choose **New**.

Select the location where you would like to save your library. Enter a name for the library and click [Save].

Do not store the library in a cloud service like Dropbox, OneDrive or iCloud. This might lead to library corruption.

Note that the library is made up of both an .ENL file and a corresponding .DATA folder.

It is recommended that you maintain one library only.

MAKING A BACKUP COPY OF A LIBRARY

Open the library in EndNote.

From the **File** menu, select **Compress Library (.enlx)**. (**Mac: File > Compressed Library...**)

Make sure that the options With File Attachments and All References in Library are selected.

Windows: Click [Next].

Mac: Click [OK].

Choose the location where you would like to save your backup copy. Enter a name and click [Save]. The backup copy includes both the .ENL file as well as the corresponding .DATA folder.

LIBRARY WINDOW LAYOUT

The Library window includes several work areas, such as the Groups panel and the Reference List panel.

The screenshot shows the EndNote 20 interface with several callouts:

- Default groups and groups that you create:** Points to the left sidebar containing 'All References', 'Recently Added', 'Unfiled', 'Trash', and 'MY GROUPS'.
- Simple and advanced search:** Points to the search bar at the top of the reference list.
- Detailed overview of a selected reference:** Points to the right-hand pane showing the details of the selected reference.
- List of references in your EndNote library:** Points to the central table of references.
- Preview of a reference formatted with a specific output style:** Points to the bottom section of the right-hand pane showing the formatted citation.

Reference Details (Vancouver style):

Randomized trial vs. observational study of acupuncture for migraine found that patient characteristics differed but outcomes were similar

K. Linde, A. Streng, A. Hoppe, W. Weidenhammer, S. Wagenpfeil and D. Melchart

J Clin Epidemiol 2007 Vol. 60 Issue 3 Pages 280-7

Accession Number: 17292022 DOI: 10.1016/j.jclinepi.2006.06.014

1. Linde K, Streng A, Hoppe A, Weidenhammer W, Wagenpfeil S, Melchart D. Randomized trial vs. observational study of acupuncture for migraine found that patient characteristics differed but outcomes were similar. Journal of clinical epidemiology. 2007;60(3):280-7.

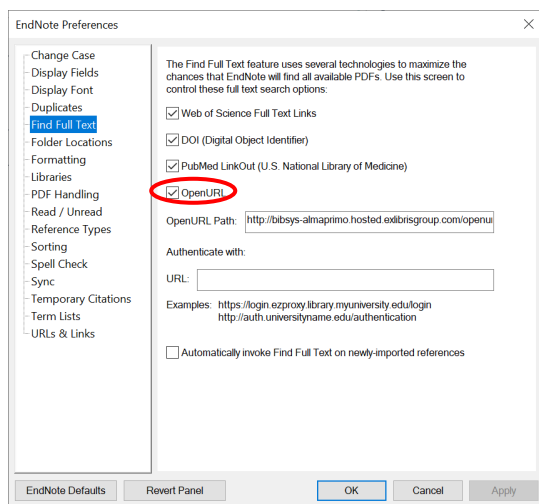

ENDNOTE PREFERENCES

Windows: From the **Edit** menu, choose **Preferences** to access EndNote preferences.

Mac: From the **EndNote 20** menu, choose **Preferences** to access EndNote preferences.

FIND FULL TEXT PREFERENCES

Select the **Find Full Text** panel.

Select the OpenURL, Web of Science, DOI and PubMed check boxes.

To search NTNU University Library, enter the following OpenURL path:

http://bibsys-almaprimo.hosted.exlibrisgroup.com/openurl/NTNU_UB/NTNU_UB_services_page

Windows: Click [OK].

Mac: Click [Save] and close the window.

DUPLICATES PREFERENCES

Select the **Duplicates** panel.

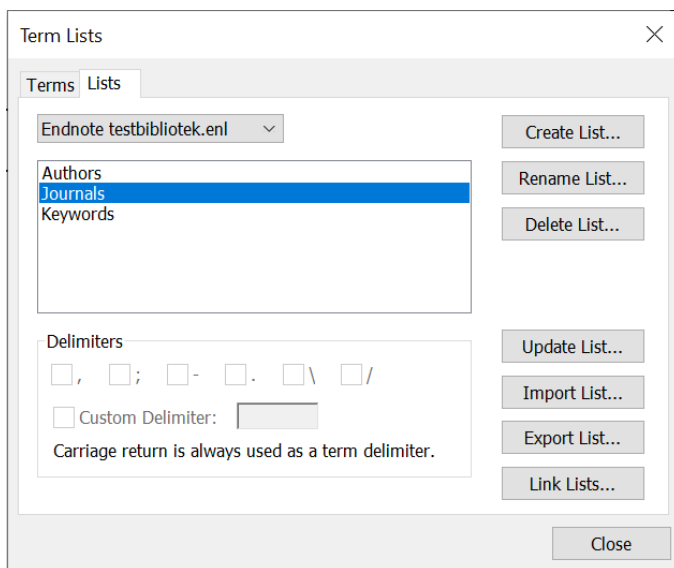

Select the DOI check box if you want to include the DOI field in duplicate detection.

JOURNAL LIST

EndNote provides several lists of journal names and abbreviations that can be imported for use with your EndNote library.

Open the library in EndNote.

From the **Library** menu, choose **Define Term Lists**.

Click on the **Lists** tab and highlight **Journals**.

Click [Import List].

Select the file **Medical** in the journal lists folder to import the list for medicine.

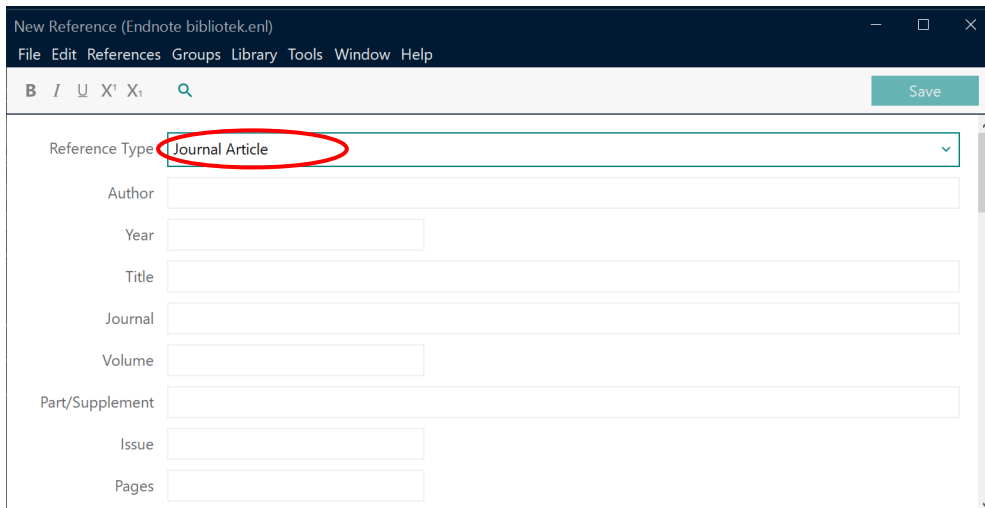

Mac: Navigate to the journal lists folder, select the file Medical. The journal lists folder is named Terms. By default, the location is Applications\EndNote 20\Terms

Select the Terms tab to see the list of full journal names and their matching abbreviations.

Do not import more than one journal list. Import the list before entering references.

MANUALLY ENTERING REFERENCES

From the **References** menu, choose **New Reference** or click on the  button to add a new reference to an open library.

The screenshot shows a window titled "New Reference (Endnote bibliotek.enl)". The menu bar includes "File", "Edit", "References", "Groups", "Library", "Tools", "Window", and "Help". The toolbar contains "B", "I", "U", "X", "X1", a search icon, and a "Save" button. The main form has a "Reference Type" dropdown menu with "Journal Article" selected and circled in red. Below it are input fields for "Author", "Year", "Title", "Journal", "Volume", "Part/Supplement", "Issue", and "Pages".

Choose a reference type from the **Reference Type** drop-down list.

Tips for choosing the right reference type:

Journal Article	journal article
Book	books written by one or more authors
Edited Book	books edited by one or more editors
Book Section	part of edited or non-edited books (for example, a chapter)
Web Page	material from a Web page

Enter the bibliographic data into the fields in the reference. Press the TAB key to move to the next field.

Information about a few selected fields:

Author Enter author names with the last name followed by a comma and the first name.
Always enter author names one name per line.
Examples:

Smith, Mary Elizabeth
Smith, J. R.

When entering corporate authors, put a comma after the name.

Examples:

University of California,
University of California,, Irvine

To accept an author name that EndNote has suggested, press the ENTER or the TAB key.

Journal	Full journal name
Alternate Journal	Abbreviated journal name
File Attachments	Use the File Attachments field to link a PDF file to the reference. Windows: Choose the  button to link a PDF file to the reference. Mac: From the References menu, choose File Attachments > Attach File and select a file to link to the reference.

Special bibliographic formatting and punctuation should not be included when you enter reference data into EndNote (for example, enter titles without a period or any other punctuation at the end).

Windows: Click [Save] to save the data.

Click the close button to close the reference or choose **Close Reference** from the **File** menu.

Mac: Click the close button to close the reference or choose **Close Reference** from the **File** menu. Click [Save] to save the data.

EXPORTING REFERENCES FROM PUBMED TO ENDNOTE

In EndNote you may use the direct export feature to import references from PubMed directly into EndNote. See next page for instructions on how to export multiple references.

EXPORTING ONE REFERENCE FROM PUBMED

Make sure that your EndNote library is open.

The screenshot shows the PubMed.gov search results page. At the top, the NIH logo and 'National Library of Medicine National Center for Biotechnology Information' are visible. The search bar contains 'migraine acupuncture'. Below the search bar are buttons for 'Advanced', 'Create alert', and 'Create RSS'. There are also buttons for 'Save', 'Email', and 'Send to', and a 'Sorted by: Best match' dropdown menu. A 'MY NCBI FILTERS' icon is present. The search results show '579 results'. On the left, there is a 'RESULTS BY YEAR' bar chart showing an increasing trend from 1965 to 2021. The first result is 'Acupuncture for migraine prevention.' by Da Silva AN. The 'Cite' button next to the result is circled in red. Below the result, there is a 'Share' button and a summary of the article's content.

Perform a PubMed search.

Click [Cite] to the left of the reference that you want to export to EndNote.

The screenshot shows the 'CITE' dialog box in PubMed. It contains the citation text: 'Da Silva AN. Acupuncture for migraine prevention. *Headache*. 2015;55(3):470-473. doi:10.1111/head.12525'. At the bottom of the dialog box, there are three buttons: 'Copy', 'Download .nbib', and 'Format: AMA'. The 'Download .nbib' button is circled in red.

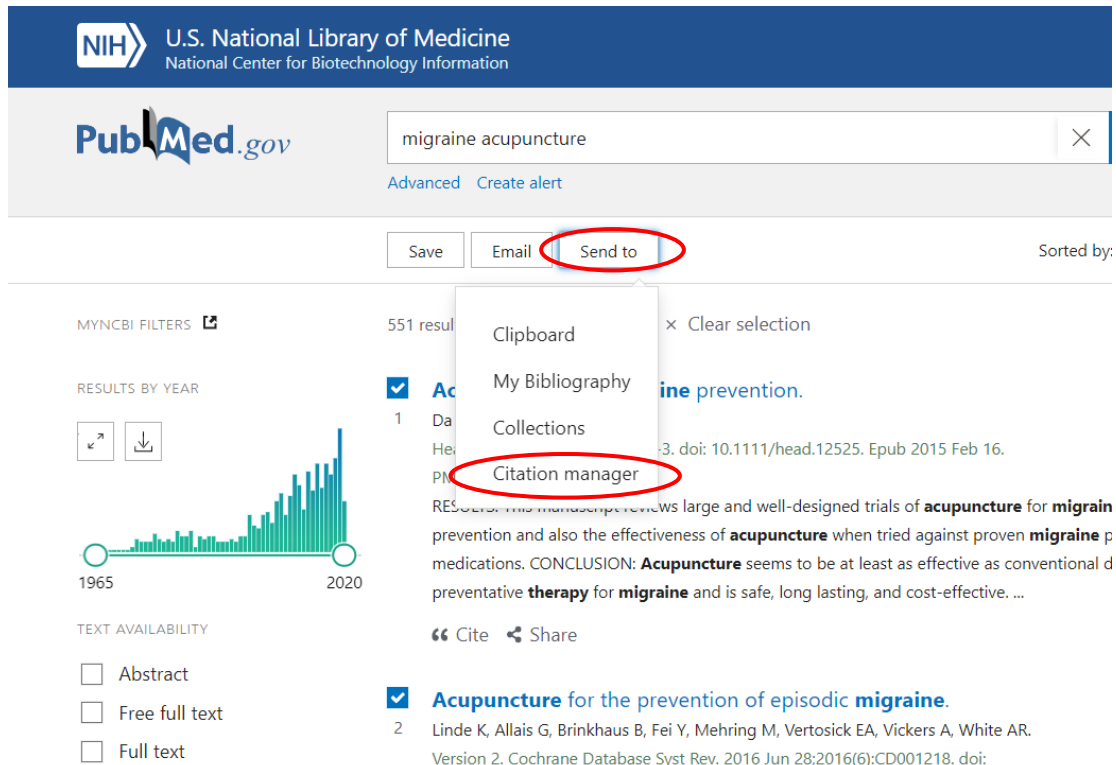

Choose [Download...].

Select the option [Open], if possible. If the reference automatically is saved to a file on the desktop open the saved file.

Peruse the imported data to make sure it imported as expected.

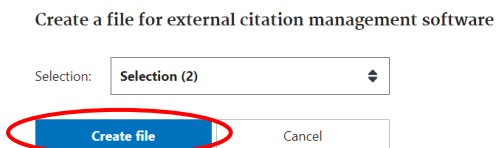

EXPORTING ONE OR MULTIPLE REFERENCES FROM PUBMED

Make sure that your EndNote library is open.

Perform a PubMed search and select the reference(s) that you want to export to EndNote.

From the Send to menu, choose **Citation manager**.

Choose [Create file].

Select the option [Open], if possible. If the references automatically are saved to a file on the desktop open the saved file.

Peruse the imported data to make sure it imported as expected.

IMPORTING A FILE OF REFERENCES FROM PUBMED

You may save PubMed references to a file and then import the file of references into EndNote. Note that direct export (see page 11-12) is an easier way to get data into EndNote because it involves no intermediate steps.

RESULTS BY YEAR

Acupuncture for migraine prevention.

1 Da Silva AN.
Headache. 2015 Mar;55(3):470-3. doi: 10.1111/head.12525. Epub 2015 Feb 16.
PMID: 25683754 Review.
RESULTS: This manuscript reviews large and well-designed trials of **acupuncture** for **migraine** prevention and also the effectiveness of **acupuncture** when tried against proven **migraine** p medications. CONCLUSION: **Acupuncture** seems to be at least as effective as conventional d

Step 1:

Perform a PubMed search and select the reference(s) that you want to import into EndNote.

Choose [Save].

Select **PubMed** from the Format menu.

Click [Create File] and save the file.

Step 2:

Go to EndNote and make sure that your library is open.

Windows: From the **File** menu, choose **Import > File**.

Click [Choose] to locate and open the file you want to import.

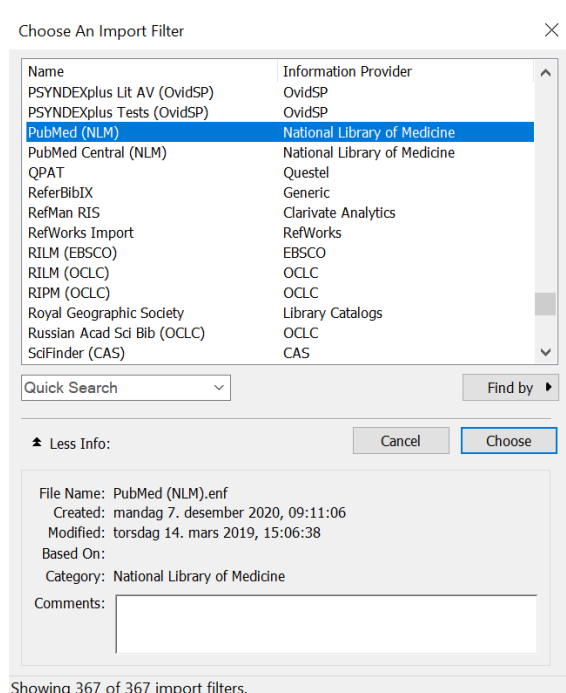

Mac: From the **File** menu, choose **Import**.

Locate the file you want to import. Click [Options].

Select the **PubMed (NLM)** filter from the Import Option list.

If you do not find the PubMed (NLM) filter in the Import Option list, choose **Other Filters** to see a list of available import filters.

Highlight the **PubMed (NLM)** filter and click [Choose].

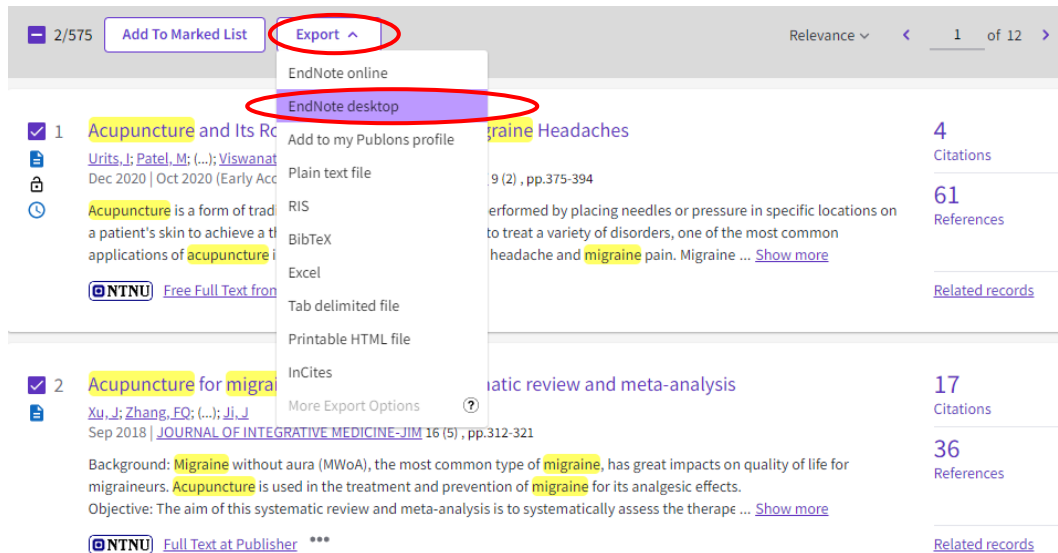

Select what EndNote will do with duplicates (import all references, discard duplicates or put duplicates in a separate duplicate library).

Click [Import].

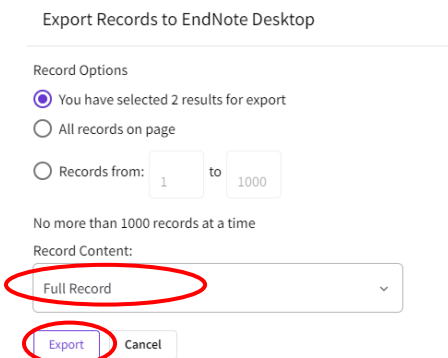

Peruse the imported data to make sure it imported as expected.

EXPORTING REFERENCES FROM WEB OF SCIENCE TO ENDNOTE

Make sure that your EndNote library is open.

Perform a Web of Science search. Select the reference(s) that you want to export to EndNote. From the Export menu, choose **EndNote desktop**.

Select the data to include.
Click [Export].

Select the option [Open], if possible. If the reference(s) automatically are saved to a file on the desktop open the saved file.

Peruse the imported data to make sure it imported as expected. Run duplicate detection.

SEARCHING PUBMED FROM WITHIN ENDNOTE

This search interface is intended for basic searches, not advanced searches.

In the Groups panel under Online Search, select **PubMed (NLM)** to establish a connection with the PubMed database. (If PubMed (NLM) does not appear under Online Search in the Groups panel, follow the instructions on page 17).

PubMed (NLM)

	Author (Smith, A.B.)	Contains	keller	+	x
And	Author (Smith, A.B.)	Contains	kelly	+	x
And	Title	Contains	schizophrenia	+	x

[Clear search](#) [Search options](#) [Search](#)

Choose a field to search and enter a search term.

You can combine search lines with the Boolean operators And, Or, and Not.

Click [Search] to begin the search.

Note that the search results are displayed in the library, but the references are not automatically saved to the library.

Highlight the reference(s) you want to keep. Choose the  button to copy the highlighted reference(s) to the library.

Once you have searched an online database, it appears under **Online Search** in the Groups panel. Click on the database you wish to search under Online Search, and EndNote connects to the online database.

IMPORTING PDF FILES TO CREATE NEW REFERENCES

EndNote is able to import a PDF file and automatically create a new reference for it in your library. The PDF file will be attached to the reference.

Note that the PDF file must be publisher-created and contain a DOI (Digital Object Identifier) to import.

Make sure that your library is open.

Windows: From the **File** menu, choose **Import > File**.

Click [Choose] to locate and open the PDF file you want to import.

Set the Import Option to **PDF**.

Mac: From the **File** menu, choose **Import**.

Locate the PDF file you want to import.

Click [Options]. Set the Import Option to **PDF File or Folder**.

Select what EndNote will do with duplicates (import all references, discard duplicates or put duplicates in a separate duplicate library).

Click [Import].

Peruse the imported data to make sure it imported as expected.

You can also import an entire folder of PDF files at once.

Windows: Select **File > Import > Folder** during the import.

Mac: Select **File > Import** during the import.

SEARCHING AN ENDNOTE LIBRARY

Click on the **All References** group to search the entire library.

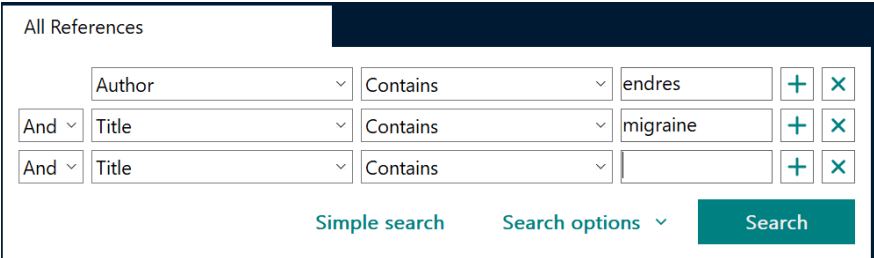

SIMPLE SEARCH

Type a search term into the search text box and press the ENTER key to search your library and attached PDF files.

ADVANCED SEARCH

Click **Advanced search** below the search text box or from the **Library** menu, choose **Advanced search**.

All References	Author	Contains	endres	+	x
And	Title	Contains	migraine	+	x
And	Title	Contains		+	x

[Simple search](#) [Search options](#) [Search](#)

Choose a field to search and enter a search term.
You can combine search lines with the Boolean operators And, Or, and Not.
Click [Search] to begin the search.

MANAGING AND ORGANIZING REFERENCES

SORTING REFERENCES

All References
8 References

	Author	Year	Title	Journal	Last Updated
	Haigh, C.	2009	Acupuncture reduced fr...	Evid Based ...	20.09.2018
	Diener, H. ...	2009	Migraine: is acupuncture...	Nat Rev Ne...	16.01.2017
	Alecrim-A	2008	Acupuncture in migraine	Clin J Pain	16.01.2017

References can be sorted by clicking on a column heading.

FINDING DUPLICATE REFERENCES

Click on the **All References** group.

From the **Library** menu, choose **Find Duplicates**.

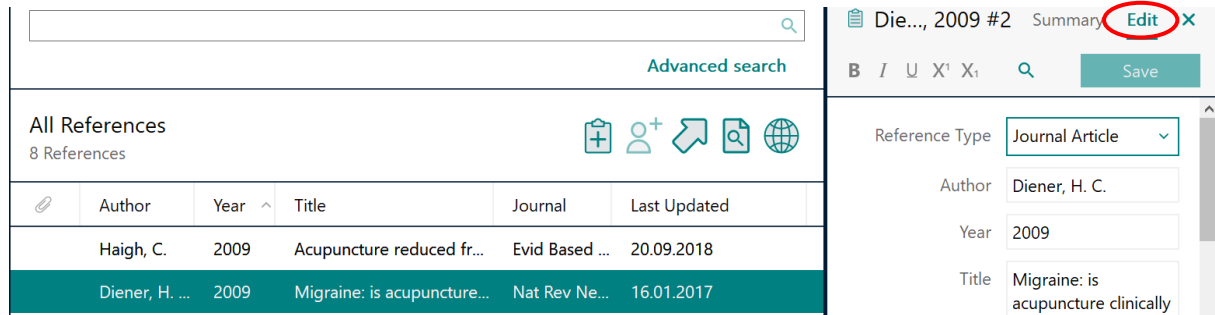

Click [Keep This Record] to save that particular reference.

EDITING REFERENCES

Highlight the reference. Click [Edit] in the panel to the right or from the **References** menu, choose **Edit Reference**.

Edit the reference data. Click [Save] to save the changes.

The screenshot shows the EndNote interface. On the left, there is a search bar and a table of references. The table has columns for Author, Year, Title, Journal, and Last Updated. The second row is highlighted in green. On the right, there is an edit panel for the selected reference, with the 'Edit' button circled in red. The edit panel includes fields for Reference Type, Author, Year, and Title.

Author	Year	Title	Journal	Last Updated
Haigh, C.	2009	Acupuncture reduced fr...	Evid Based ...	20.09.2018
Diener, H. ...	2009	Migraine: is acupuncture...	Nat Rev Ne...	16.01.2017

Reference Type: Journal Article
Author: Diener, H. C.
Year: 2009
Title: Migraine: is acupuncture clinically

UPDATING REFERENCES

EndNote can update references by retrieving information from databases such as PubMed and Web of Science.

Highlight the reference(s). From the **References** menu, select **Find Reference Updates**.

Click [Update All Fields] or [Update Empty Fields] or click [Edit Reference] to manually update the reference and click [Save and Continue] to save the changes.

DELETING REFERENCES

Highlight the reference(s) you want to delete.

From the **References** menu, choose **Move References to Trash**.

The references are not completely deleted until you choose Empty Trash.

Note: Do not delete references that have been used in a paper that you might want to reformat later.

CUSTOM GROUPS

Custom Groups are manually created by the user to help organize the library.

From the **Groups** menu, choose **Create Group** to create a custom group. Give the group a name.

Select the references you want to add to the group. From the **Groups** menu, choose **Add References To** and then select a group, or drag and drop the selected references onto the group in the Groups panel.

To delete a group, highlight the group. From the **Groups** menu, select **Delete Group**. The references that were in the group are still part of the library.

To remove references from a group, highlight the references. From the **Groups** menu, select **Remove References from Group**. The references will still be in your library.

SMART GROUPS

Smart groups are built with search strategies and are dynamically updated as you add references to and edit references in the library.

From the **Groups** menu, select **Create Smart Group**. Enter a name for the group.

Choose a field to search and enter a search term.

You can combine search lines with the Boolean operators And, Or, and Not.

Click [Create] to create the smart group.

GROUP SETS

You can create group sets to organize custom and smart groups.

From the **Groups** menu, choose **Create Group Set**. Enter a name for the group set. You can drag groups to the group set, or you can create new groups under the group set heading.

PRINTING REFERENCES

If you do not want to print all showing references, highlight the desired references.

Choose a style from the drop-down list of output styles.

From the **File** menu, select **Print** to print a list of references.

CREATING AN INDEPENDENT BIBLIOGRAPHY

An independent bibliography is generated independently of a paper. (See pages 26-32 for instructions on how to generate a bibliography based on citations found in a paper).

EXPORTING REFERENCES

Open the library in EndNote.

If you do not want to export all showing references, highlight the desired references.

From the **File** menu, choose **Export** or click on the  button.

Select the type of file to be exported (Text File, Rich Text Format, HTML or XML).

From the Output style list at the bottom of the dialogue, choose a style.

If you do not find an appropriate style, choose **Select Another Style** to see a list of available output styles. Highlight a style and click [Choose].

To export all of the references in the library, click on the **All References** group.

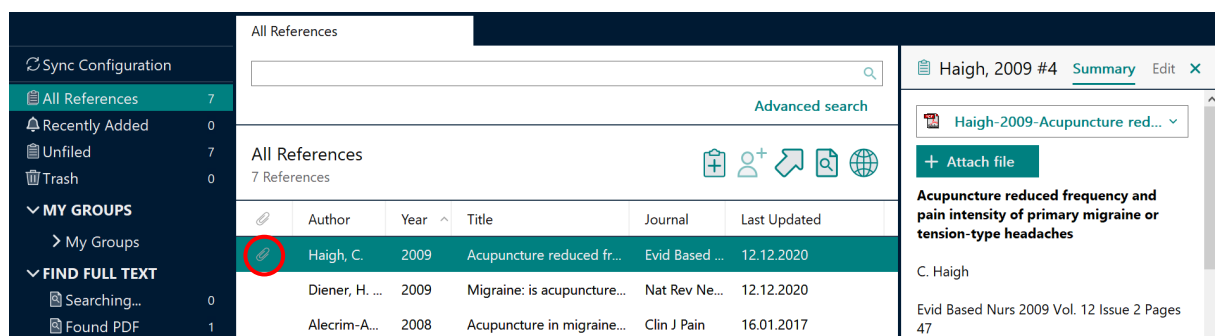

FINDING FULL TEXT FOR A REFERENCE

EndNote can attempt to locate full text files for the references. Once found, EndNote downloads and attaches the files to the references.

Make sure that your computer is connected to the network at NTNU.

Highlight the reference(s) to which you want to add full text.

From the **References** menu, select **Find Full Text > Find Full Text** or click on the  button.

The screenshot shows the EndNote interface. On the left is a sidebar with navigation options: Sync Configuration, All References (7), Recently Added (0), Unfiled (7), Trash (0), MY GROUPS (My Groups), and FIND FULL TEXT (Searching... 0, Found PDF 1). The main area displays a table of references under the heading 'All References' (7 References). The table has columns for Author, Year, Title, Journal, and Last Updated. The first row is highlighted in green and has a paper clip icon in the left margin, indicating a full text file is attached. The second and third rows are also visible. On the right, a preview pane shows the details for the selected reference: 'Haigh, 2009 #4', 'Summary', 'Edit', and 'X'. Below this, there is a dropdown menu with 'Haigh-2009-Acupuncture red...' and an 'Attach file' button. The preview text reads: 'Acupuncture reduced frequency and pain intensity of primary migraine or tension-type headaches', 'C. Haigh', and 'Evid Based Nurs 2009 Vol. 12 Issue 2 Pages 47'.

Author	Year	Title	Journal	Last Updated
Haigh, C.	2009	Acupuncture reduced fr...	Evid Based ...	12.12.2020
Diener, H. ...	2009	Migraine: is acupuncture...	Nat Rev Ne...	12.12.2020
Alecrim-A...	2008	Acupuncture in migraine...	Clin J Pain	16.01.2017

When a full text file is downloaded and attached to a reference, a paper clip icon appears.

OPENURL LINK

The OpenURL Link command displays the full text if available. Note that EndNote only locates the full text. The full text file is not downloaded.

Make sure that OpenURL is enabled (see page 7), and that your computer is connected to the network at NTNU.

Highlight the reference.

From the **References** menu, choose **URL > OpenURL Link**.

USING ENDNOTE WHILE WRITING IN WORD

EndNote's Cite While You Write feature inserts EndNote commands into Word to give you direct access to your references while writing a paper with Word.

Windows: Cite While You Write commands are displayed on an EndNote tab on the ribbon (Word 2010, 2013, 2016 or 2019).

Mac: Cite While You Write commands are displayed on an EndNote tab on the ribbon (Word 2016 or 2019).

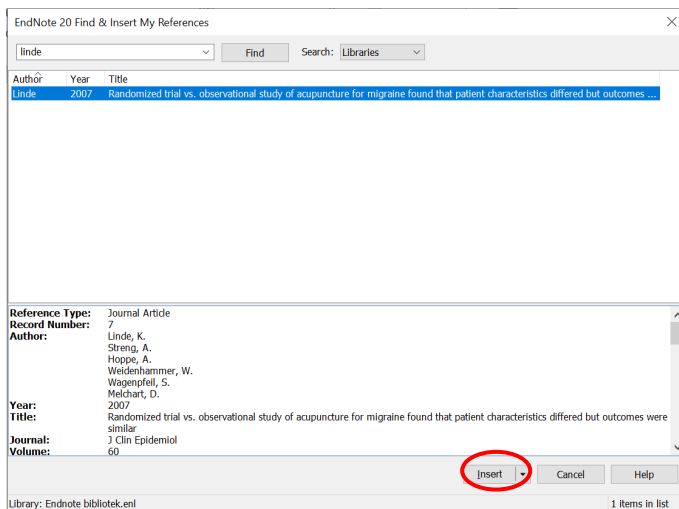

Open the EndNote library and open the Word document.

INSERTING CITATIONS

Method 1:

Position the cursor in the text where you would like to put the citation.

Select the  button on the EndNote tab in Word.

Windows: Enter a search term and click [Find].

Mac: Enter a search term and press the ENTER key.

Highlight the appropriate reference.

Click [Insert] or select an option from the drop-down list.

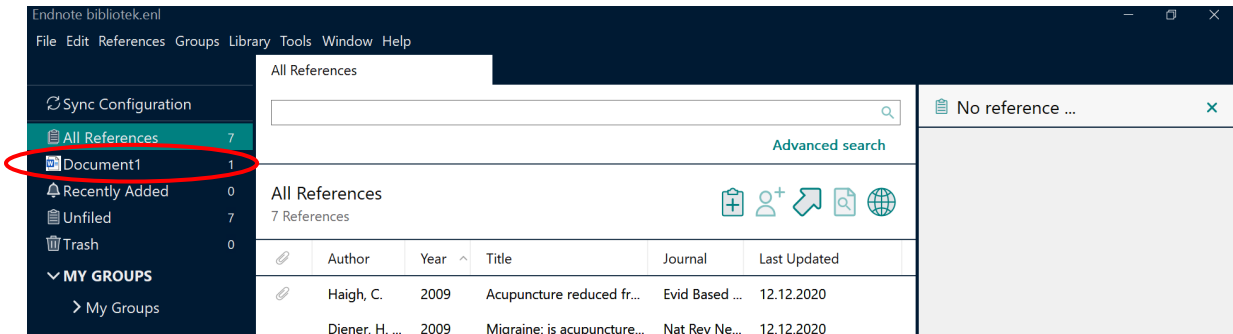

Method 2:

Position the cursor at the location where you would like the citation.

Highlight the desired reference(s) in your EndNote library.

Windows: Select the  button and then click **Insert Selected Citation(s)** on the EndNote tab in Word. (Shortcut in EndNote: Alt+2).

Mac: Select the  button and then click **Insert Selected Citation(s)** on the EndNote tab in Word. (Shortcut in EndNote: Ctrl+2).

Note that EndNote creates an auto-group for the Word document currently open. The auto-group contains all the references cited in the document.

GENERATING A BIBLIOGRAPHY

By default, your citations and bibliography are automatically formatted as you work.

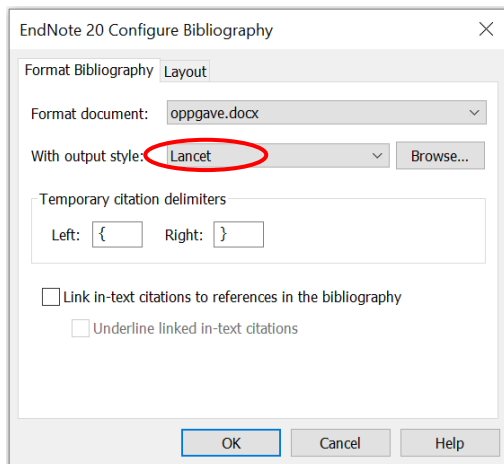

If your citations are not automatically formatted, and a bibliography is not updated each time you insert a citation, do the following:

Select the  **Update Citations and Bibliography** button on the EndNote tab in Word.

SELECTING A DIFFERENT OUTPUT STYLE

Windows: Select an output style from the style menu on the EndNote tab in Word or choose the **Bibliography**  button (corner arrow).

Mac: Select an output style from the style menu on the EndNote tab in Word or choose the **Configure Bibliography** button .

Select the **Format Bibliography** tab.

Use the With output style option to choose a different style. Click [OK].

If you do not find an appropriate style, click [Browse] to display a list of available output styles. Highlight a style and click [OK].

ADDING STYLES TO THE OUTPUT STYLES LIST

More than 7000 styles are available, although a typical EndNote installation includes only the most popular styles. You can select additional styles as needed from the EndNote Website.

From EndNote's **Help** menu, choose **EndNote Output Styles**.

Perform a search to locate the desired style.

Style or Journal Name	Citation Style	Discipline	Date	
Lupus	Superscripted Number	Medicine	2012-04-11	Download

Click [Download] and then click [Open]. If the file automatically is saved open the saved file.

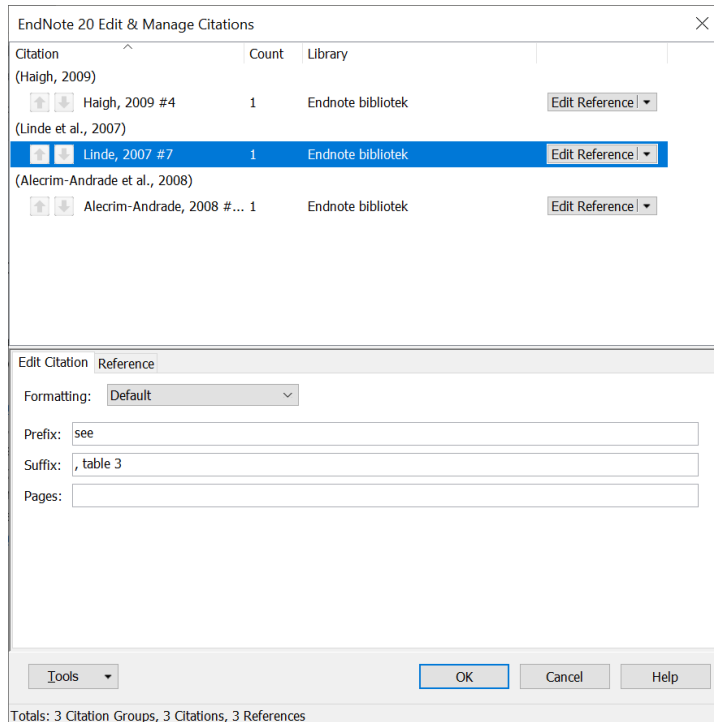

From EndNote's **File** menu, choose **Save As**.

Enter a file name and click [Save].

EDITING CITATIONS

Click on the citation you wish to change.

Select the  **Edit & Manage Citation(s)** button on the EndNote tab in Word.

Make sure the appropriate citation from the list is highlighted and make the change(s), for example, omit the author name from the citation (formatting drop-down list) or add text before/after the citation.

Click [OK].

DELETING CITATIONS

Click on the citation you wish to delete.

Select the  **Edit & Manage Citation(s)** button on the EndNote tab in Word.

Make sure the citation you want to delete is highlighted. Choose the **Remove Citation** option from the drop-down list at the right.
Click [OK].

EDITING A REFERENCE

If you want to edit a reference (for example, need to correct the title), edit the reference in the EndNote library.

Highlight the citation in Word.

Select the  **Edit Library Reference(s)** button on the EndNote tab in Word.

Make the changes, click [Save], and close the reference in EndNote.

Return to Word.

Choose the  **Update Citations and Bibliography** button on the EndNote tab in Word.

UNFORMATTING CITATIONS

Windows: Choose the  **Convert Citations and Bibliography** button and then click **Convert to Unformatted Citations** on the EndNote tab in Word.

Mac: Choose the  **Tools** button and then click **Convert to Unformatted Citations** on the EndNote tab in Word.

To format the citations and generate a bibliography:

Select the  **Update Citations and Bibliography** button on the EndNote tab in Word.

Note that in order to format the paper again the corresponding EndNote library must be open.

REMOVING FIELD CODES

EndNote places Cite While You Write field codes in the Word document. You may need to remove the field codes in order to share your document with a publisher.

Windows: Choose the  **Convert Citations and Bibliography** button and then click **Convert to Plain Text** on the EndNote tab in Word.

Mac: Choose the  **Tools** button and then click **Convert to Plain Text** on the EndNote tab in Word.

Save a copy of the document without field codes.

Make sure that you keep the original document, which retains field codes, as you can not reformat a document without field codes.
