Ønsker du å importere en enkelt-referanse klikker du på **"Export"** (1) i høyremenyen og deretter valget for **"RIS format"** (2).

Velg deretter **"Export"** (3).

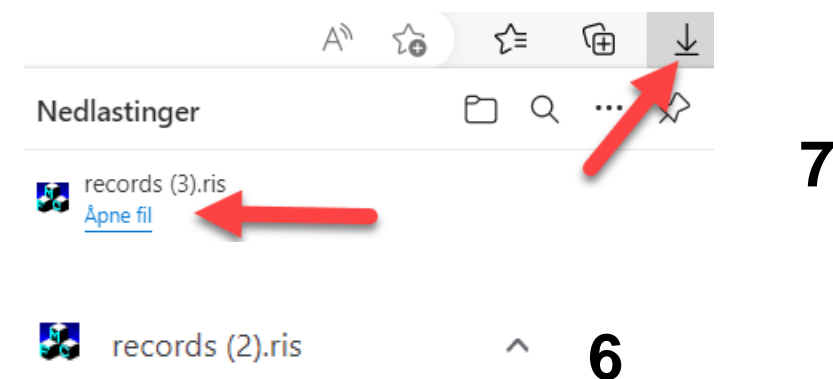

Velg så **"Download"** (4) i det nye vinduet som åpnes.

Ready for download

**4**

Hva som skjer videre er avhengig av nettleseren du bruker. I noen tilfeller overføres referansen direkte til EndNote. I andre tilfeller må du be om at eksportfila åpnes i EndNote.

Bruker du **Mozilla Firefox**, må du klikke for å åpne fila (**5**) og deretter importeres referansene rett inn i biblioteket ditt.

Bruker du **Google Chrome** må du klikke "**Åpne**" eller "**Åpne alltid ...**" (**6**) for den nedlastede fila som ligger nede til venstre i vinduet.

Bruker du **Internet Explorer** må du velge "**Åpne fil**" (**7**).

Bruker du **Safari på en Mac** vil nettleseren automatisk laste ned importfila i nedlastninger. Du må gå til Finder og finne igjen importfila. Dra deretter fila over til EndNote-ikonet nederst på skjermen. Referansene vil nå bli lastet inn i biblioteket ditt.

EndNote åpner nå en liste med den importerte referansen. Det er lurt å åpne et par av referansene for å sjekke at importen er korrekt (sjekk at de ulike referanse-dataene er kommet inn i korrekt felt).

Velg "**Show all references**" fra "**References**" menyen for å se alle referansene i biblioteket ditt.

## Import av flere referanser på en gang:

The screenshot shows the EndNote search results interface. At the top, there is a navigation bar with "Results" (highlighted with a blue box and a '2' callout), "View", "Export" (highlighted with a blue box and a '3' callout), "Email", and "Add to Clipboard". On the right, it shows "1 — 25" and a blue arrow button. Below the navigation bar, there is a filter section with "Select number of items" (dropdown), "Selected: 5 (clear)", "Show all abstracts", and "Sort by: Relevance" (selected) and "Author". The main content area displays a list of four search results, each with a numbered callout (1, 2, 3, 4) next to a selection box. Each result includes the title, author(s), journal information, and citation count. Below each result are links for "Embbase", "Abstract", "Index Terms", "View Full Text", and "Similar records".
