Examination time:	4 hours
Credits:	7.5
Grades to be announced on:	19th June, 2015
Permitted examination support material:	None
Language:	English
Number of pages:	2
Number of pages enclosed:	0

The exam consists of three tasks. It is expected that you do them all. The weighting is indicated with percentages. You may answer in Norwegian.

Task 1: 25 %

Climate change research can typically be categorized as working on issues related to climate change mitigation or climate change adaptation. Outline briefly the difference between mitigation and adaptation.

Task 2: 25 %

In the context of extreme weather events, what is integrated vulnerability assessment?

Task 3: 50 %

Discuss the difficult and disputed relationships between climate change, migration and conflict.
