Question 1
The process of urbanization is in operation in all parts of the world and has a health impact. Analyze how urban physical and social environments may influence the in-migrants’ risk behavior and the incidence of common diseases and health problems. Discuss trends and future challenges related to these diseases (health problems) in urban areas. Discuss also health favorable effects of the urban environment for the in-migrants. You can choose one country, which could be classified as a high-, medium or low income country, to contextualize and exemplify your presentation.

Question 2
Discuss how (local) physical, social and cultural factors may contribute to healthy or unhealthy places. Consider the importance and give examples of:
- favorable and unfavorable health behavior to (un)healthy places
- in- and out-migration to (un)healthy places
