Dear Bernt Arne Bertheussen,

I read your "Power to business professors: Automatic grading of problem-solving tasks in a spreadsheet" article in the *Journal of Accounting Education* and your dissertation with interest. Please send me the "open source system available from the author" mentioned in your dissertation. I would like to possibly use your system in my current Financial Modeling with Spreadsheets course at Baruch College of the City University of New York.

Thank you,

Adrienne Wheeler, Ed.D.
