Students will find the examination results in Studentweb. Please contact the department if you have questions about your results. The Examinations Office will not be able to answer this.
Please answer ONE of the following two questions:

1. Firstly, give examples from the course literature on how children use diverse places. Secondly, discuss how conflicts over space may occur between children and adults by applying theoretical perspectives and concepts.

2. Child development as a way of thinking about (or constructing) children and childhood has been heavily criticized by the Social studies of children and childhood (Sociology of childhood). Outline the critique and discuss issues of 'normality' and testing of children in relation to health and schooling.
