Students will find the examination results in Studentweb. Please contact the department if you have questions about your results. The Examinations Office will not be able to answer this.
Please **answer ONE** of the following two questions:

1. Discourse is a much applied theoretical concept within a constructivist perspective. First, clarify the meaning of this concept and secondly, elaborate on discourses of childhood in relation to past and present issues.

2. Social studies of children and childhood (Sociology of childhood) has criticized earlier 'mainstream' research for being adultcentric and dominated by an individualist perspective. Present briefly why this critique has been put forward, and discuss alternative ways to approach children and childhood.
