prints the value of the variable A
on the serial monitor

What signs must succeed
void setup() ?

By the Parenthesis

delay(100)

What are A0, A1, A2,...?

;

Digital ports

Serial.print("A");

$11_{(2)} = ?$

476

3

the function has no numerical output

Serial.begin(9600);

{
...
{

serial data

Number of milli seconds elapsed since start or reset

int
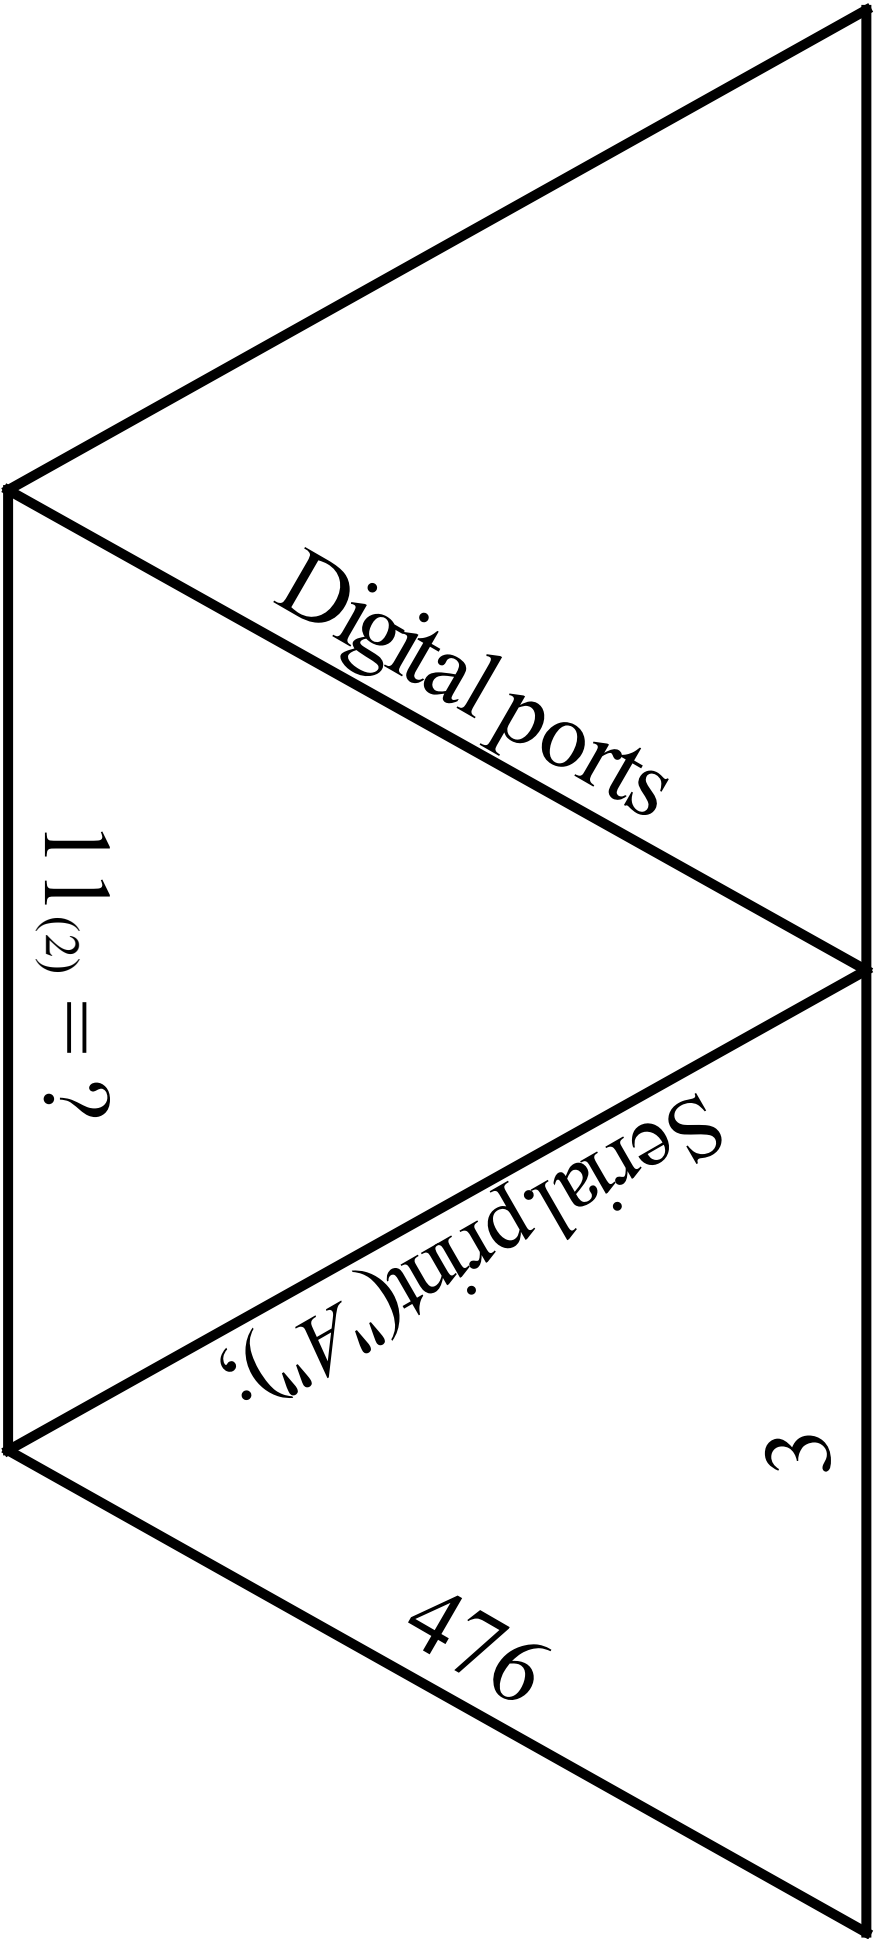

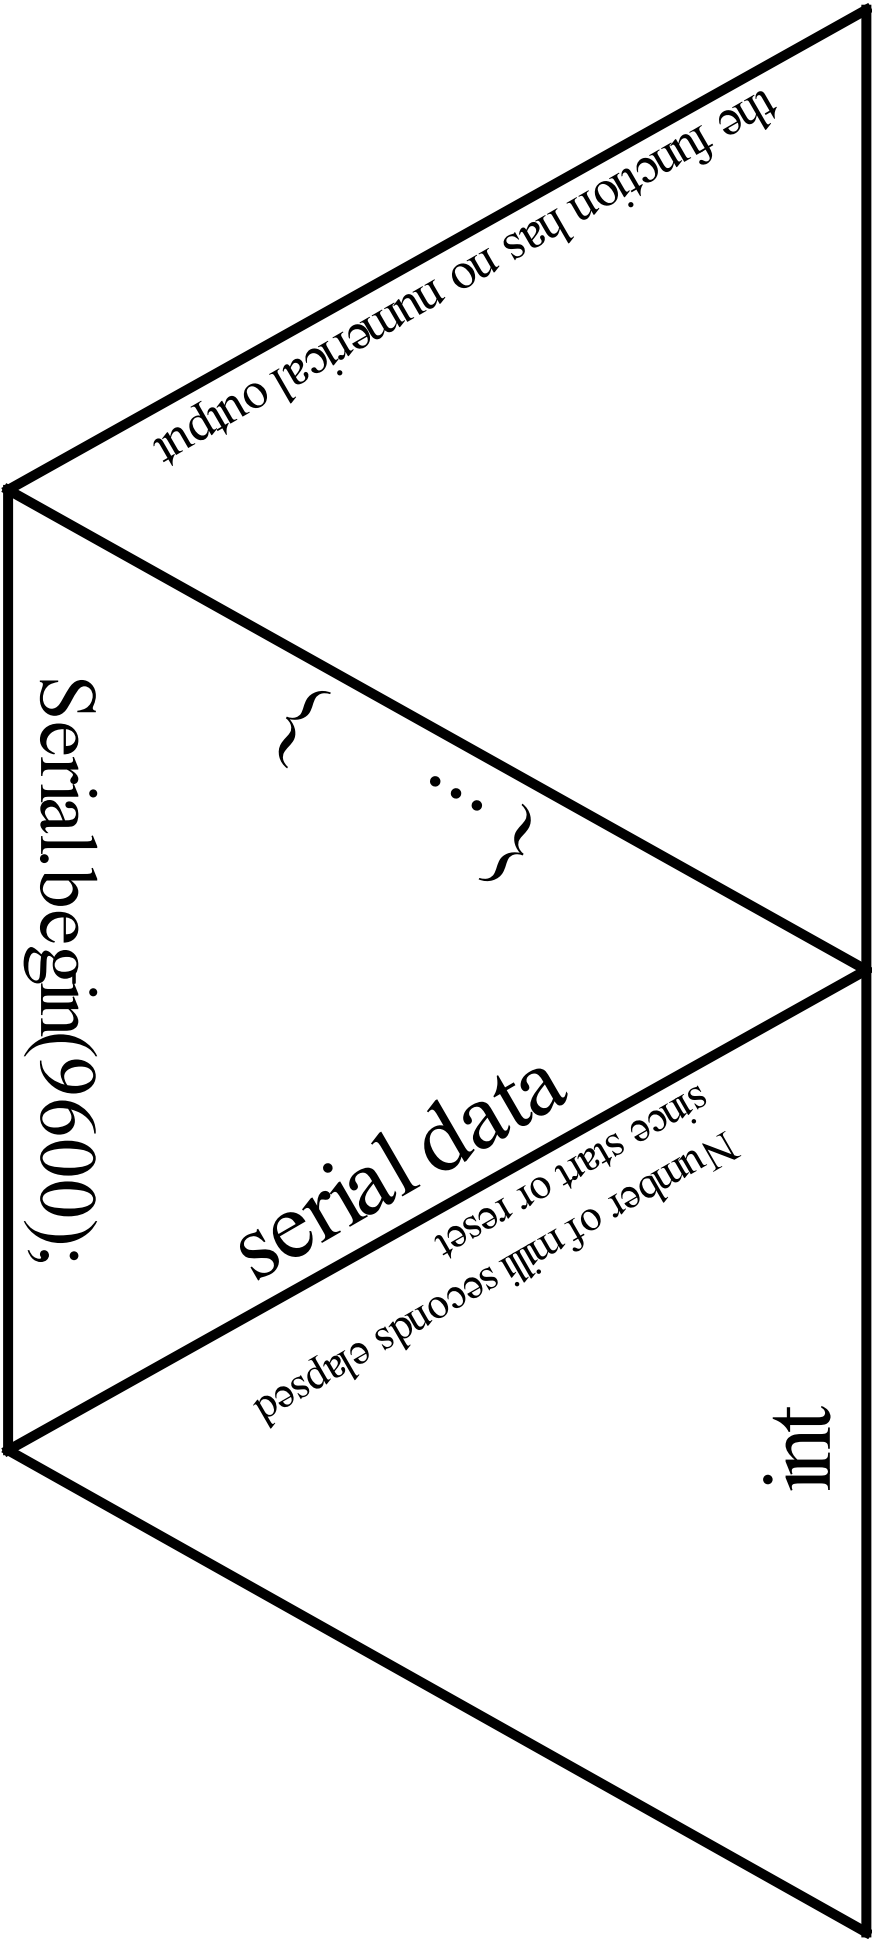

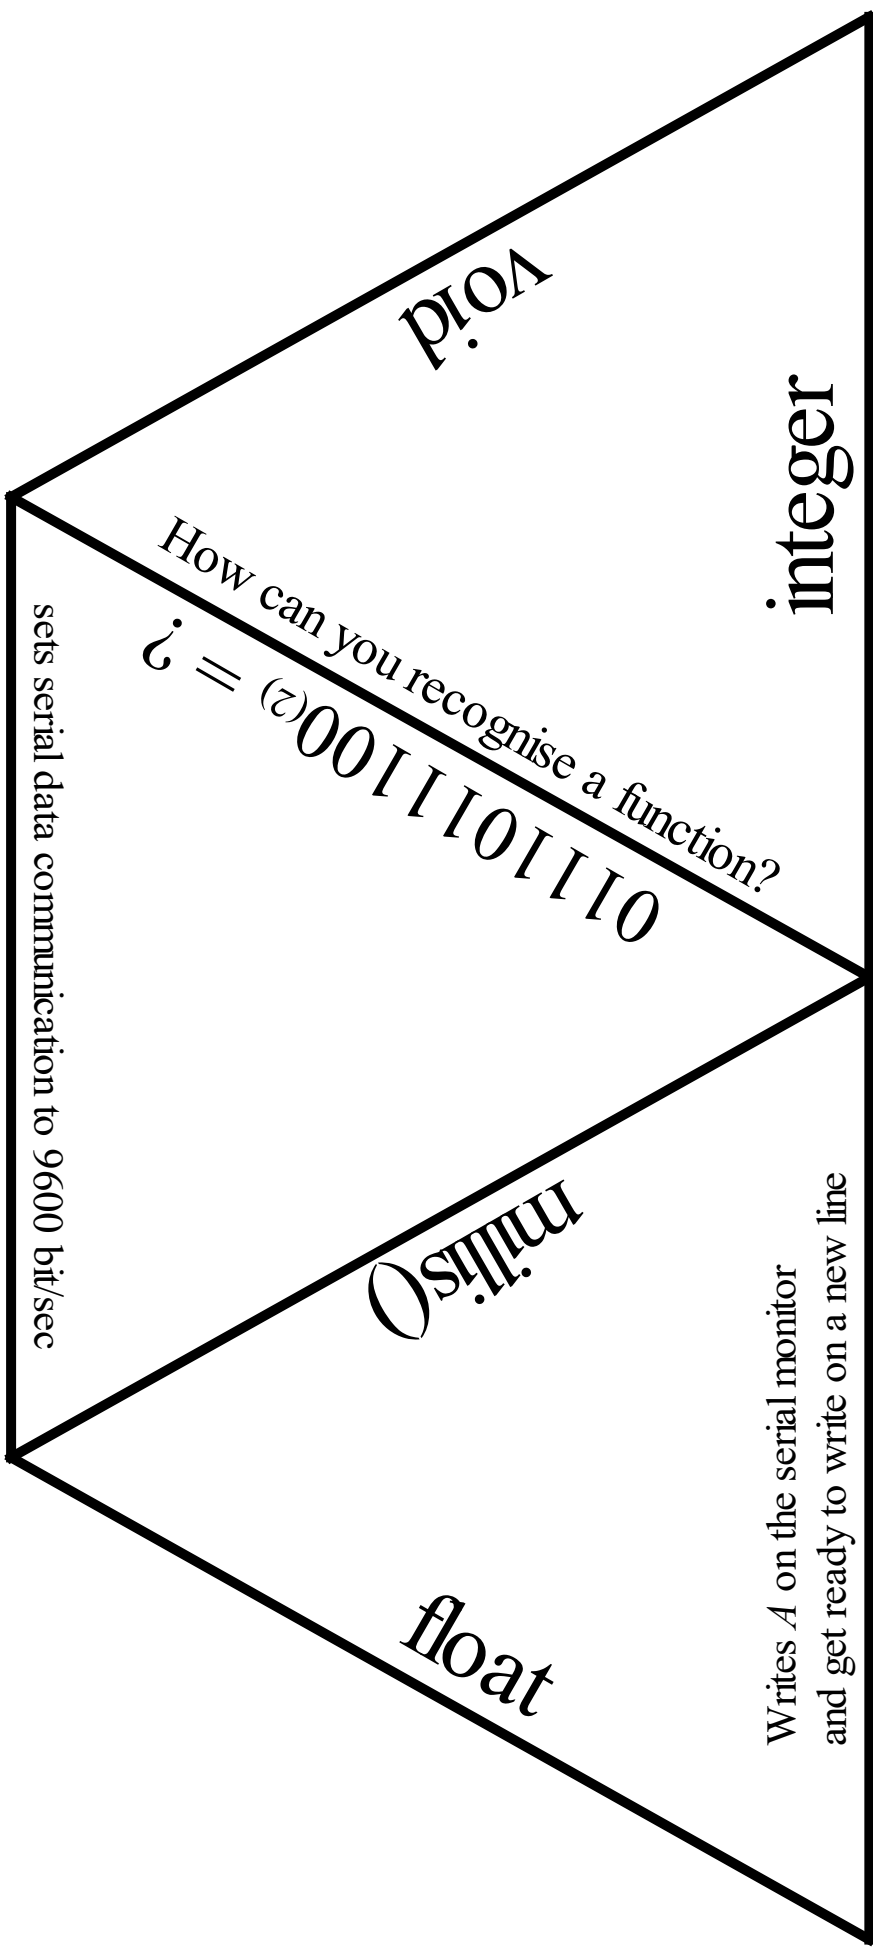

void

integer

How can you recognise a function?

$01101110_{(2)} = \ ¿?$

sets serial data communication to 9600 bit/sec

millis()

float

Writes A on the serial monitor and get ready to write on a new line

Serial.println("A");

Writes A on the serial monitor

What sign ends a line in your code?

serial clock

Waits 100 milliseconds before continuing

SDA

SCL

decimal number

Serial.print(*A*)

Analogue output ports

What are D0, D1, D2, …?
