Post code/place:

NTNU manages, renews and mediates knowledge, and the people in our organisation represent our most important resource. NTNU seeks to create a working and learning environment that provides inspiration and fosters creative thinking, constructive problem solving and the capacity for critical appreciation. The systematic work to promote health, safety and the environment (HSE) constitutes an important tool for achieving this.

All units work systematically towards the purpose of NTNU attaining its goals within health, safety and environmental issues:

- Our employees are provided with good task that are safe and conducive to the development of their personalities, and the working environment stimulates creativity, constructive attitudes and critical thinking. The students are provided with a good learning environment through sound adaptation of academic conditions, welfare, and the physical working environment. The working and learning environment promotes the capacity to work and learn, furthers health and well-being, and provides protection against work-related sickness as well as occupational accidents.
- Environmental awareness permeates all aspects of the unit's activities. The unit works continuously to reduce the strain on the environment by opting for environmentally sound alternatives in its daily operations.
- The unit meets the requirements laid down in the laws and regulations on health, safety and environmental concerns, including the those laid down in the Regulations related to systematic health, environmental and safety activities in enterprises (Internal Control Regulations), as well as other laws and regulations that are relevant from an HSE perspective.

The requirements laid down in ISO 14001 Environmental Management Systems form the basis for building up our own HSE system at NTNU, and Environmental Management constitutes and integrated part of our HSE system (NTNU is not ISO 14001 certified).

NTNU is organised in compliance with existing tax- and working environment laws and regulations in terms of social and trade union rights.

We accept that upon request, the commissioner will be granted the right of going through and verifying NTNU's HSE system.
