

Notes for Contributors

Aims and Scope. *Transactions of The Royal Norwegian Society of Sciences and Letters* is a multi-disciplinary journal, covering subjects from sciences in broad sense to mathematics, technology, social sciences, theology, philosophy, history, literature, linguistics, and arts. Publication is irregular and each issue usually contains a single article. Original as well as review works with empirical or theoretical emphasis are accepted, and the size may vary from ordinary journal articles to theses, seminar-/symposium reports etc. However, acceptance of large manuscripts and those containing colour prints may be conditional on financial contribution from the author.

Transactions are indexed/abstracted in relevant international data bases for scientific publications.

Manuscripts. All submissions will be subject to the normal process of peer review. Manuscripts should preferably be written in English, but German and French will be accepted as well as Scandinavian languages when these come naturally from the subject. However, all manuscripts must have an English summary. Manuscripts should be submitted electronically, as e-mail attachment, preferably as **word-files**. Manuscripts should be submitted as camera-ready as possible. A covering letter must contain a statement that the manuscript has not been published or submitted for publication elsewhere, and that co-authors give their consent to publication.

Preparation of Manuscripts. Pages should be numbered consecutively throughout the paper. The submitted manuscript must contain author(s) mailing address, telephone number, and e-mail address. 'Corresponding author' must be indicated.

References are indicated in the text by the name and date system, e.g. 'Arthur & Berthur (2002)' or '(Arthur & Berthur, 2002)'. If a cited work has more than two authors, cite the reference as 'Arthur et al.'. In the reference list however, the names of all authors should be given. When citing more than one reference at a time, list them in alphabetical order. The reference list should be written in alphabetical, alternatively in numbered order.

Format for the literature list should be as in the following examples:

Article in journal: Gesztesy, F. & Holden, H. 2000. The classical boussinesq hierarchy revisited. *Trans. R. Norw. Soc. Sci. Lett.* 2000 (1).

Chapter in book: Searchy, W.A. & Nowicki, S. 2000. Male-male competition and female choice in the evolution of vocal signalling. In: *Animal Signals. Signalling and Signal Design in Animal Communication* (Espmark, Y., Amundsen, T., & Rosenqvist, G., eds), pp. 301-315. Trondheim, Norway: Tapir Academic Press.

Book: Borgen, P. 1996. *Early Christianity and Hellenistic Judaism*. Edinburgh: T. & T. Clark.

Thesis: Jensen H. 2002. Causes and consequences of individual variation in fitness-related traits in house sparrows. Ph.D. thesis, Norwegian University of Science and Technology.

When using numbered references they should appear as (e.g.)

[13] Gesztesy, F. & Holden, H. 2000. The classical boussinesq hierarchy revisited. *Trans. R. Norw. Soc. Sci. Lett.* 2000 (1).

[17] Borgen, P. 1996. *Early Christianity and Hellenistic Judaism*. Edinburgh: T. & T. Clark.

Offprints. Twenty five offprints are supplied free of charge for single-authored articles. When two or more authors, each receives 15 offprints. Additional offprints must be ordered beforehand and paid by author(s).

Further information is available on the Society's website: <http://www.dkmvs.no>.

Transactions of The Royal Norwegian Society of Sciences and Letters

The Royal Norwegian Society of Sciences and Letters was founded in 1760 and the Transactions (Skrifter) first appeared in 1761. The Transactions series is among the oldest scientific publications in the world.

Det Kongelige Norske Videnskabers Selskab ble stiftet i 1760 og Skrifter utkom første gang i 1761. Det er en av verdens eldste vitenskapelige skriftserier som fremdeles utkommer.
