*provides information persistence and context to your PowerPoint™ presentations*

[Compare](#)[Construct](#)[Collaborate](#)

## Compare

Choosing the most effective photograph, image or design can be difficult, unless they are arrayed in the same size, format and resolution in front of you. Multi-Slides allows side-by-side comparisons to be made using PowerPoint, in an easy to use and easy to view environment.

All this from a single PowerPoint presentation running from a single computer.  
Annotations can be made with any interactive device (whiteboard, panel, graphics tablet, tablet pc).
