Information about Student Exchange

Disclaimer. This is a tool for helping IDI's students, so far focusing on Gløshaugen students, but hopefully also of some use within all IDI. The tool does not have any official status with respect to agreements at NTNU.

A new info page, covering all IDI, is under way. Preliminary version: https://innsida.ntnu.no/wiki/-/wiki/Norsk/Utveksling+++IDI

General
Welcome to our wiki for IDI students who are planning to study abroad.

This wiki contains information and links for setting up a plan for your exchange study. You should also look at the general NTNU information page: https://innsida.ntnu.no/utenlandsstudier.

Please read and make yourself familiar with the information on this page before addressing the IDI student exchange advisors!

All requests about student exchange must be addressed to utveksling@idi.ntnu.no (previously science-exchange@idi.ntnu.no). This is an IDI-internal list shared by both administrative and scientific advisors at IDI Gløshaugen.

All administrative requests will be process by the administrative advisors. They will handle all practical issues regarding rules for exchange stays, how to prepare and register for an application, etc.

The scientific advisors will handle all questions related to the contents of courses, including the mapping of NTNU courses to courses in universities abroad.

NB! For all requests, you need to tell us which study program you follow (datateknologi or informatikk) and which specialisation/profile, as no administrative requests will be handled by the scientific advisor assigned for that specialisation (see below).

IDI's administrative advisors are:
- Kristin S. Karlsen and Unni Kringtø Eide, Student administration office

IDI's scientific advisors for specialisations linked to the three IDI Gløshaugen groups are:
- Computer: Anne C. Elster, room 410 IT Building Vest
- Data and Artificial Intelligence: Agnar Aamodt, room 322 IT Vest
- Information Systems and Software Engineering: Sobah Abbas Petersen, room 106 IT Vest

We have a weekly consultation slot, in our respective offices, normally on Mondays 1400-1600, but this may vary. To make sure you may send us an email to make an appointment. Although more and more requests are handled by email, you are very welcome to visit us in person!

For some issues you may be asked to contact an advisor at the IE faculty, who are:
- Julie Elisabeth Takacs for computer science (datateknologi) (MIDT/MTDT/..)
- Trude Buøy Solvang for informatics (informatikk) (BIT/MSIT/..)

Filling in the pre- and post-approval forms.
The pre-approval form Seknad om forhåndsgodkjenning is to be found here.
The Post-Approval form: Seknad om endelig godkjenning is to be found here.

Please note that the standard NTNU forms do not ask for all the information we need at IDI for a smooth application process, so make sure to:

1) Add your specialisation/profile (studieretning/hovedprofil) after specifying your Studieprogram, either on the same line or after your email address.

2) Make an explicit mapping between your expected NTNU courses and the courses you plan to take abroad.

See the GNAG DB for a list of universities with their course credits corresponding to NTNU (ECTS) credits. Please note that this database may not always be 100% updated.

When filling in a form - depending on your study program:
- Find classes that are good matches to your obligatory (O) classes and other requirements.
- Fill up with other (CS) classes to at least 30 ECTS pr. semester.
- K-emne should be similar to something on the K-emne list.
- "Ingeniøremne annet Studieprogram" can be any engineering course, but not a pure CS course.
• EiT and KPro/IT3010 will be approved as long as you have a total of 20 ECTS with Group/Team project work in all your classes. IT3010 should also contain research methodology issues.

• Fill up with other (CS) classes to at least 30 ECTS pr. semester.

For all follow-up requests when abroad, such as changes to your signed pre-approval form
- remember to always tell which IDI study program and specialisation you follow
- remember to always send a copy to utveksling@idi.ntnu.no, even if you are in a dialog with a particular scientific advisor

Pre-approval before going

• You will find lists of courses offered by foreign universities in the meny to the left, under Computer science (Datateknologi, Informatikk), grouped by country. Before sending your form to utveksling@idi.ntnu.no, please make sure that the courses that you want to get approved are either already approved or - if not - please insert them as suggestions in the Comments field in the page of the respective university, in the same format as the main table.

• For an overview of which courses you should have taken if you were at NTNU, see Study plans for Datateknologi or Informatikk:
  - studieplan-realfag#programmeCode=BIT
  - studieplan#programmeCode=MIDT
  - studieplan#programmeCode=MTDT
  - studieplan#programmeCode=MIT
  - studieplan#programmeCode=MSIT

• Example of fill-in form

For both pre and after approvals, when you have got a signature from IDI you will need to send your form to the IE faculty administration, together with all transcripts and documents you have received from your foreign university, for final check and formal approval.

For pre-approval, upload the form to

• Søknadsweb + send a message about that to Julie Takacs (datateknologi) or Trude Solvang (informatikk).

For final approval, send the form to:

• postmottak@ie.ntnu.no, indicating “Søknad om endelig godkjenning av emner” in the title field.

Application deadlines

Look at the NTNU site: Click here
