Q: I am a student in another [department/faculty] than [IDI/IE]. Can I take TDT39?

A: As long as you are allowed to register to the course it is OK with us. Some disciplines use different research strategies and data generation methods than those covered in this course. But the general framework should be useful also for other disciplines. Though remember that we cannot adapt the course to other disciplines than ICT. To register, talk to student admin office.
