

Work packages

This is the start page to access individual work package pages. On each page you will find a description of the work package and details of its members and deliverables, news on progress and links to external websites where partners have been creating material or which are relevant to that WP's activities. The page called "Deliverability" has details of some of the qualities which we think deliverables should have. The page entitled 'The S-TEAM books - 4.6 and 6.15' provides a common space for discussion of the two proposed books, over and above their individual pages as deliverables.
